

## PROF LESLEY SCOTT

Lesley Scott is an associate professor and head of Research and Development in the Wits Diagnostic Innovation Hub within the Faculty of Health Science at the University of the Witwatersrand.

Lesley is an applied scientist and holds a PhD in Molecular Medicine with more than 20 years experience in designing, developing and evaluating innovative solutions across the TB, HIV and COVID-19 diagnostic value chain.

She is passionate about the role diagnostics play in improving patient care in our region and she continues to support the next generation of applied scientists at Wits.
